transformation solutions**

Turbil Group

Industrial group specialized in the comprehensive development of all phases of the metal transformation process.

We are a business holding with both national and international presence, born from the growth of a family-run company with over 60 years of history.

+42 countries

+220 employees

+24K m² facilities

+140K references

+12M units sold

Turbil with responsibility.

At Turbil, we are committed to Corporate Social Responsibility (CSR), integrating ethical and sustainable principles into our daily practices.

We actively contribute to the United Nations Sustainable Development Goals (SDGs), with a strong focus on human rights and environmental protection.

For us, CSR is not an external initiative, it is a core part of our business model. We firmly believe that ethical and sustainable development is essential for long-term growth.

We promote responsible practices that create value for both the company and society.

More than 60 years growing

Jacinto Aguerri founded Escaleras Aguerri in Beire, Navarra (Spain). A family business dedicated to the manufacture of wooden stairs in the traditional way, and produced the removable staircase.

The beginning

1966

1992

We began to grow

We moved to the La Nava Industrial Estate in Tafalla (Navarra, Spain) and began to manufacture a staircase entirely made of fiberglass (FRP) for the electrical sector.

We began to develop the manufacture of aluminium stairs for the renewable energy and construction sectors.

Aluminium arrives

1998

2007

Quality benchmarks

We successfully obtained ISO 9001 certification for the design and manufacture of the company's quality system.

We opened a new production plant in the La Nava Industrial Estate, in Tafalla (Navarra, Spain).

We expanded

2008

2013

International expansion

We opened our first international factory in Chennai (India).

Following our aim of creating a complete service for our customers we developed a new thermo-lacquering automation.

New horizons

2015

2016

We embraced the future

We opened a robotic line with two different robots, increased production and implemented our certification to the ISO 9001:2015 standard.

We designed a new automotive line both for aluminium profile machining and ladder assembling that allows us to increase speed up to 10 times compared to the previous process.

Unstoppable

2018

2020

Solvent capacity

We opened a new factory with more than 8.000 m² in Navarra for aluminium profile machining and ladders production. 10 plants are currently operating.

We embraced Turbil Group, an industrial group made up of four leading companies in the sector.

Consolidation

2024

Aguerri

Specialized manufacturers in aluminium profile transformation for both in-house and customer products

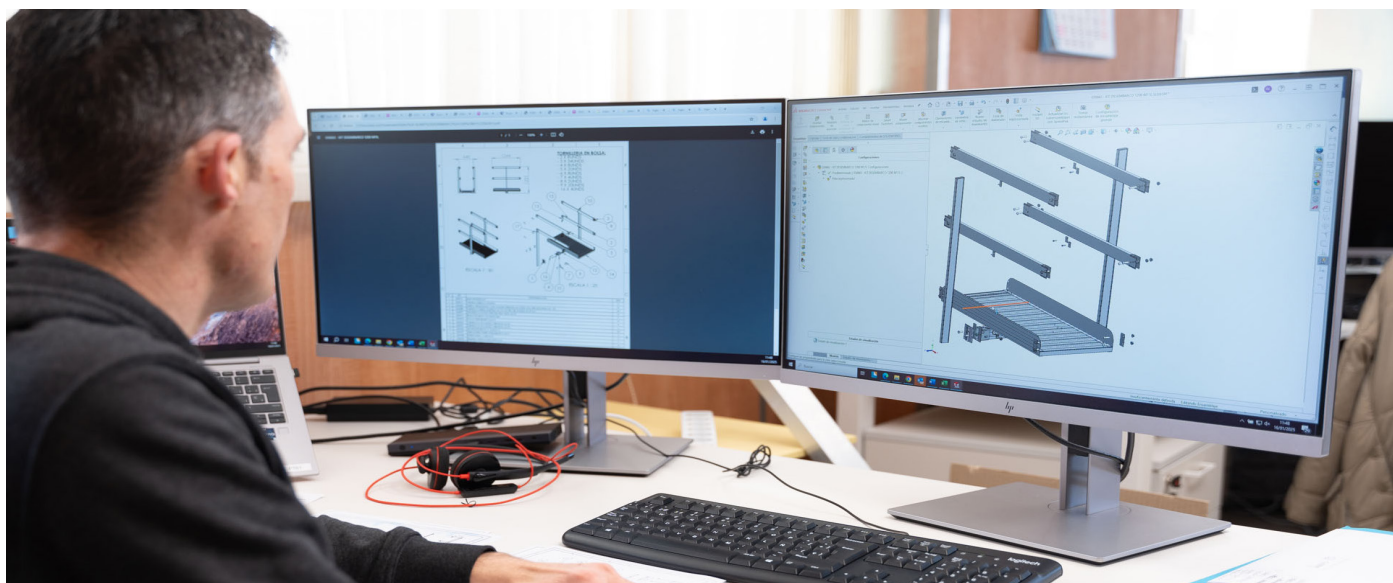

Our extensive experience, specialization and technological acquisition in the transformation of aluminium, allows us to offer products of the highest quality, as well as to propose and include improvements in the manufacture of external products.

In **Aguerri**, located in the heart of the European industry, we combine innovation, precision and sustainability to meet the most demanding needs of our clients. With a high-performance production capacity and a highly qualified team, we are able to develop customized solutions, adapting to the specific challenges of each project. Our strengths lie in flexibility, attention to detail and commitment to excellence, positioning us as a benchmark in the aluminium transformation sector.

We create the best

We perfect what already exists

Thanks to more than 60 years of experience, we are able to lead projects in the transformation of steel products into aluminium.

We are able to develop new products carrying out performed tests such as load analysis and force studies to meet customer requirements.

We have the capacity to create prototypes and test them internally or with certified companies in order to validate the designs created and adapt our own designs to new customer needs.

Commitment to first prototypes
in **4 weeks**

Serial production in
6 weeks

Launch of **more than 100 new references** per year

We are leaders and benchmarks in the most demanding sectors

Industry, wind energy and construction

We design and produce components and safety systems, collective and individual protection solutions, roof access systems, and a range of aluminium products for:

Wind energy	Aeronautics	Railway	Lifting systems	Collective protection systems
Automotive	Individual protection systems	Lightweight structures	Solar energy	Furniture

More than **3.000t**
of aluminium profiles
per year

- Thermal cutting
- Laser cutting
- Profile optimization
- Machining
- Punching
- Stamping
- Light metalwork
- Counterweights
- Engineering
- Assembly
- Logistics

**18.000 m²
dedicated to industrial
production and aluminium
processing**

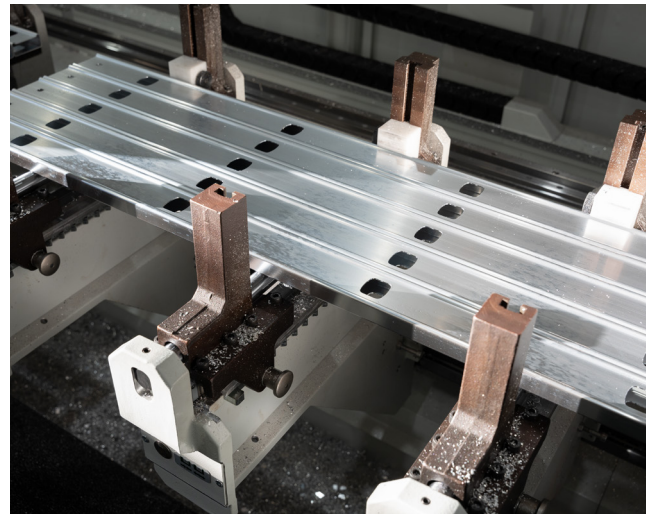

Commitment, integration and automation

Thanks to the automated warehouse system, we feed the aluminium profile cutting and machining machines directly, and manage the stock of both raw materials and processing products

Cutting and machining

In Aguerri, we have 6 cutting and machining lines for profiles and 4 CNC centers with capacities of up to 7,500 mm x 470 mm x 420 mm.

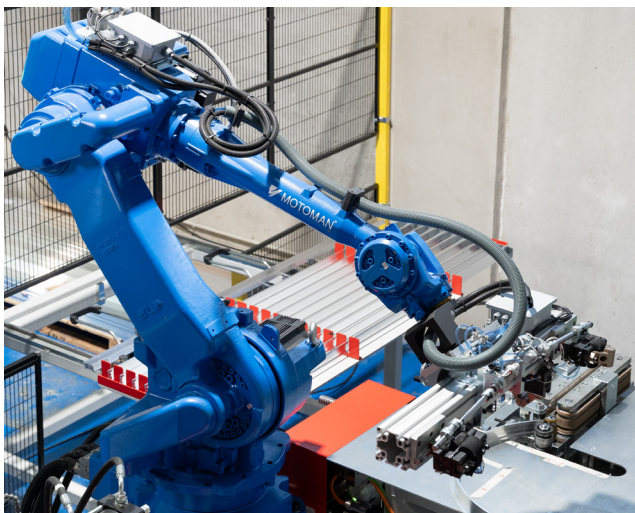

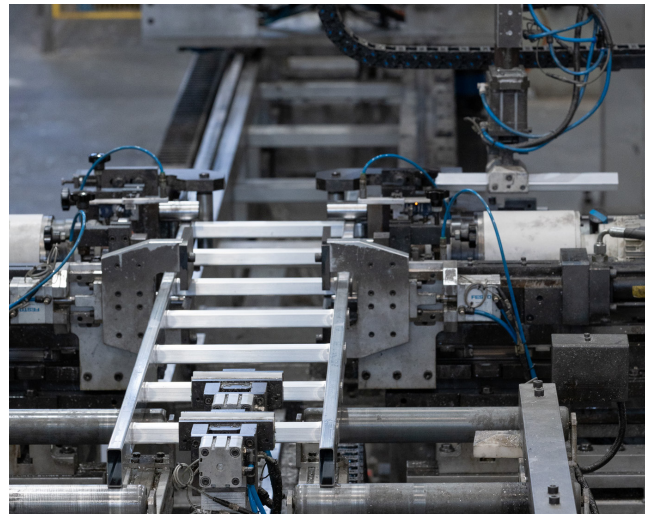

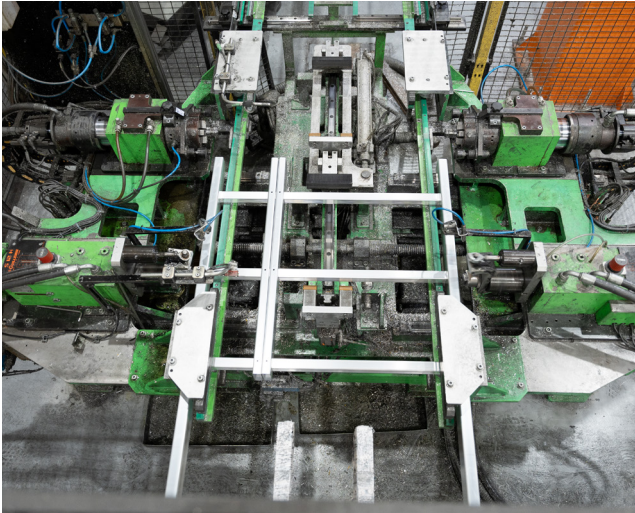

Stamping and presses

We have 15 presses with capacities of up to 150 tons, featuring an opening window of up to 400 mm.

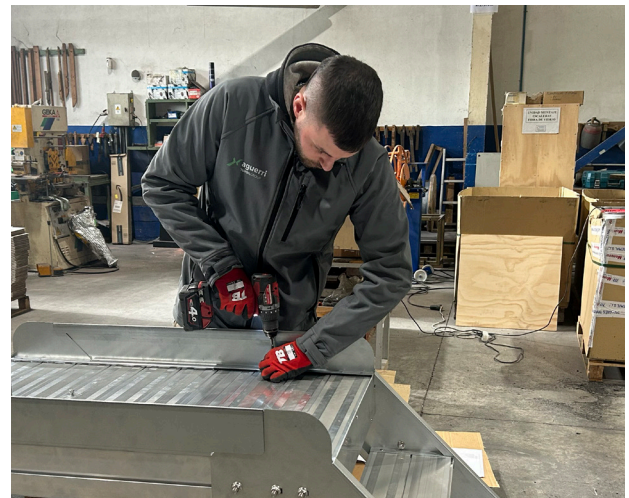

Special manufacturing processes

We have 3 collaborative robots and custom-designed machinery for aluminium profile machining and staircase assembly.

Manual work

A dedicated assembly area with more than 20 workstations is available for subassembly operations.

**Effective, efficient
and top-quality products**

Production capacity and innovation

Logistics

We understand logistics as a vital element inside our production chain, starting from the reception of material to its dispatch.

Materials from our suppliers arrive at our facilities in special cages, clearly identified for seamless integration into our automated storage system. From there, the production cycle begins, with full traceability maintained throughout the entire process until the material leaves our premises.

Capacity to load more than
25 trailers per week

5 stations dedicated to
the preparation of trucks

Together with our trusted partners, we have
already reached more than 42 countries.

Safety stock with our recurring clients,
with a maximum delivery span of 1 week

More than 85% of exports, also in difficult places
like North America, Asia or South America.

Safety and quality

In **Aguerri** we comply with all legal requirements and applicable regulations

In addition, we adhere to voluntary European and international recommendations, as well as internal measures that help us enhance the quality of our products and services, increase customer satisfaction, and ensure a safe working environment.

Our capacity for growth and continuous improvement enables us to adapt to each customer's specific requirements and to adopt any new standards that may arise.
